

Please join us on June 9-11, 2009, for HUD's "Recovery Act in Action Week," when we will take a closer look at HUD's role in implementing President Obama's plan to stimulate the American economy by investing in job creation, neighborhood stabilization and energy efficiency through the American Recovery and Reinvestment Act (ARRA).

During this week, HUD will host a series of online technical assistance Webcasts between 11 a.m. and 4 p.m. on June 9-11. These live interactive sessions will offer viewers a chance to get more information on HUD's nine ARRA programs

through presentations, panel discussions and Q&A opportunities. For details please see the Webcast schedule below. ***Please note that you do not need to register in advance to watch these Webcasts.***

Every effort will be made to answer as many questions as possible during the Webcasts. We encourage you to submit your questions *prior* to the webcast [via the designated email addresses \(www.hud.gov/webcasts/recovery/schedule.cfm\)](http://www.hud.gov/webcasts/recovery/schedule.cfm)

For those of you who are able, you are invited to watch these Webcasts at one of the 16 Field Offices across the country where HUD will be hosting “Housing Parties.” Existing grantees, new or interested applicant organizations, and organizations that are working in communities impacted by HUD’s recovery programs will have the opportunity to convene to view the “Recovery Act in Action” Webcasts amongst their peers and alongside HUD Field staff. ***Space at each of the Field Offices is limited and will be filled on a first come first serve basis.*** Interested parties must register in advance. The participating HUD Field Offices as well as the relevant contact and registration information for each is provided at www.hud.gov. *If you are having problems on the day of the Webcast, please call our technical help line at 1-877-483-5222.*

We hope you will join us!

****Please note that the HUD Reform Act, enacted in 1989 to ensure transparency, integrity, and public accountability in all HUD grant selection processes, may limit what information HUD staff can or cannot disclose to potential applicants and therefore which questions may or may not be addressed during these webcasts. All presentations and archived webcasts will be available on our Web site at www.hud.gov on June 12.***
