**Engineering Concepts, Inc. (ECI)** is a multi-disciplined professional engineering firm founded in 1992. We assist our clients from offices in Fincastle and Roanoke, VA, with civil engineering, surveying, land development, environmental engineering, and construction management services. Our mission is “creating success – through diligent service, relationships based on confidence, and innovative, yet practical solutions.” Our clients, who are municipal and private sector clients throughout the Commonwealth of Virginia, are well-served by our range of in-house expertise – civil and environmental engineering as well as surveying and landscape architecture. The leadership and hands-on participation of our project managers has proven to be the hallmark of our reputation and the catalyst of our success.
