

Risk Management and Compliance Solutions for the 21st Century

At Assura, we turn risk into reward for our clients. We do this by using our expertise to understand your security and risk management goals and tailor solutions that meet your needs.

Our consultants are industry leaders who understand that solutions need to meet multiple business objectives. To that end, we are experts in the art and science of converged risk management that helps organizations to build or improve programs that:

- Balance the need of the organization to have proactive risk management while ensuring compliance with regulatory requirements such as the Commonwealth of Virginia IT Risk Management Standard SEC501-01, ISO 27002, Payment Card Industry Data Security Standard (PCI DSS), Virginia Executive Order 44 (2007), FEMA Guidelines, Federal Continuity Directive 1 (FCD 1), EMAP and NFPA 1600 standards and others;
- Incorporate streamlined and repeatable processes to ensure that it becomes part of the culture and delivers the long term benefit of improving the risk posture of the organization; and
- Integrates into existing operations so that people can focus on their jobs and not stop to “work on another risk/security project.”

Using Assura is the right choice for organizations that need:

- ✓ ***Top talent working with you who are leaders in information security, emergency management and continuity planning, audit and risk management.***
- ✓ ***Projects completed with the highest quality and on your timeframe – not ours. .***
- ✓ ***Work that is guaranteed.***
- ✓ ***Reasonably priced.***

We have become the only company that Virginia government uses when they want it ***done right the first time, on schedule, and within budget.***
