

Interstate Credit Collections (ICC) has been a highly effective debt collection service since 1906 when we began as the collection division of the Retail Merchants Association in Winston-Salem, NC. The parent company changed its name to DataMax Corporation in the 1980s.

Today ICC works closely with hundreds of businesses of all types and sizes including city and county governments to collect everything from parking fees and property taxes to fees for noise ordinance and fire inspection violations.

Our approach is firm but fair. Our process can include reporting accounts to the credit reporting agencies. We provide tailored collection solutions that deliver superior debt recovery. The result is a powerful partnership that generates millions of dollars each year for our clients.
