Making a Governance Difference: The Role of Purpose Driven Policy, Deliberation and Decision Making

Decision making is challenging when multiple elected officials, government professionals, and citizens are involved. Nonetheless, there must be a clear process to move from defining a problem to implementing a course of action and then evaluating the outcome realized. The class examines legal principles established by the U.S. and Virginia Constitution’s, the Dillon Rule, as well as other ordinances and regulations which influence policy making and decision making.

Funding Public Services in the 21st Century: The Role of Budgeting

In a perfect world a county budget will be driven by county goals. Establishing a budget policy and linking the county budget with clearly defined goals may be a new concept to some elected officials. The legal basis for the county operating budget and the capital improvement budget are discussed. Various forms of county budgeting are explored including line item, program, performance, zero-based and outcomes based budgeting. Local county budgets are analyzed searching for unique features and successful methodologies that are transferrable to other localities.

Inventing Your County’s Future: The Role of Community Planning

Through the examination of a variety of county comprehensive plans, class members assess the opportunities and challenges associated with land use planning. Focus is also given to knowing what local residents want for their community and ways to involve county residents in planning for tomorrow. The legal foundations of planning and zoning are reviewed and the key players in the community planning process are identified.

Managing While Leading: Understanding Your Powers, Duties and Responsibilities

Boards of Supervisors are elected to serve specific roles and guide county functions as defined by the Code of Virginia. This course reviews the powers, duties, and responsibilities of the local Supervisor in addition to identifying the skill set needed to establish a governance policy body that is consequential. Avoiding poor performance and learning how to blend leadership with strategic thinking is a course outcome.

Governance in the 21st Century: The Role of Leadership

Leadership is examined and studied from a variety of vantage points during this course. Leadership attributes, characteristics and promising practices are identified. The role leadership plays in fashioning a governance model is analyzed. By way of the assigned readings, each class participant explores individual values, habits, practices, and priorities that drive leadership choices. Using the six challenges of leadership described in the Real Leadership text, class participants can “test their mettle” while coming to grips with the challenges and opportunities only leaders can address either alone or in partnership with others.
