

Director of Public Works/County Engineer

Charles City County, Virginia, a small proactive locality located between the Richmond and Hampton Roads Regions, is seeking a Director of Public Works/County Engineer who can lead the County's overall planning, operations and maintenance of facilities, including buildings, grounds, and water/sewer utilities. Ideal candidates will be those that possess the skills to manage departmental goals and objectives, while having the knowledge and ability to perform all manner of public works and utilities functions.

The position reports to the County Administrator and involves regular interaction with all County departments as well as many outside vendors. The County is in the beginning stages of implementing an aggressive Capital Improvements Plan and the successful candidate will be in the forefront of this effort.

The successful candidate will possess strong interpersonal and public relations skills to allow for arriving at pragmatic solutions involving various officials, staff, agencies, citizens and customers. The position requires a Bachelor's Degree with coursework in engineering or a related field and considerable progressive work experience related to public works administration and operations, or an equivalent combination of education and experience.

The deadline for applications is 4:30 p.m., April 14, 2017. Starting salary DOQ and includes excellent benefits package.
