

SPOTSYLVANIA, VA

ENGINEER III: FULL-TIME

The Spotsylvania County Department of Utilities/Public Works is seeking an experienced Engineer to be assigned to the Capital Construction Division. The position will work on a wide array of projects including vertical construction, water and sewer systems, and transportation projects; the primary focus of this position will be water and sewer related infrastructure. The successful candidate is expected to make daily independent judgement in the development, design, and construction of assigned projects. Other duties that may be assigned to this position include site plan review, oversight of the construction inspection program (2 full time inspectors), and GIS management. Successful candidates should be self-motivated and willing to recognize and develop internal programs to strengthen the overall Department operations. A Professional Engineers License is required for this position and the candidate shall maintain knowledge of current industry standards, trends, and technology. Required minimum experience 9 to 12 years; position may be under filled as an Engineer II for experience levels less than 9 years. **Salary: \$72,800 - \$81,200 (DOQ). Deadline: Continuous. E.O.E.**
