SYSTEMS ARCHITECT
COUNTY OF MONTGOMERY
Department of Information Technology

Montgomery County, Virginia is currently seeking a Systems Architect to join our dynamic team! In addition to a great work environment and the opportunity to serve your surrounding community, Montgomery County offers an excellent benefits package including medical, dental, optional life, flex spending/health savings, paid training and educational opportunities, retirement, and much more!

Systems Architect is responsible for daily operational oversight of County Information Systems, including: interfacing with staff, vendors, and citizens to gather business and technical requirements; evaluating/proposing new and existing technologies to enhance productivity, user experience, and data security.

Essential duties including but not limited to:

- Manage system solutions architecture and application portfolio for the County.
- Manage enterprise systems, web sites and portals, and web security.
- Develop web and application software, web services and APIs.
- Develop software development processes including source code management.
- Evaluate application software and software development platforms and tools.
- Perform business analytics and gather and prioritize requirements.
- Translate business requirements into IT solutions by developing, configuring, modifying, and integrating systems as needed.
- Provide Tier 2 and 3 Help Desk support.
- Provide technical training and presentations.
- Manage various projects in the department.
- Monitor telecommunication and information system operating parameters and performance indicators to assess system performance levels.

Requires Bachelor's degree in Computer Engineering, Computer Science, or closely related field or equivalent combination of education and training, plus ten years related experience in a variety of computer applications and extensive software architecture and development experience in different environments. Successful candidate will have demonstrated strength in written and oral communication skills, and possess exceptional ability to collaborate effectively on cross-functional projects. Preference given for experience with information architecture, database administration, and knowledge of data-mining and warehousing techniques; plus knowledge of modern web technologies agile development methodologies, continuous integration, automated testing techniques, and cloud computing platforms.
