

BioIQ COVID-19 Solution

Introducing a COVID-19 solution for state & local government agencies and employers to help battle the impacts of this disease.

For over a decade, BioIQ has been a national leader in the management of analytics, testing, education and care navigation for such important diseases as colorectal cancer and diabetes. We have now turned our knowledge, attention, and resources to fighting COVID-19.

The COVID-19 solution enables state & local government agencies, and employers to quickly and seamlessly provide access to information and testing resources to critical infrastructure employees and high-risk member population.
