New Telehealth Flexibilities Increase Access to SUD Treatment during COVID-19

Intensive outpatient restrictions loosened, allowing for addiction telehealth therapy

“...I think sometimes it makes it even a little easier to talk cause we are still face to face, but there's that one layer of removal it seems...”

Engaging Justice-Involved Populations in Treatment

Justice-involved populations have considerable physical and behavioral health care needs that can impact health outcomes and rates of recidivism. **Ensuring that justice-involved populations are enrolled in health insurance prior to their release** can help them get the health care treatment and supports they need to re-enter the community safely and avoid re-incarceration.

64% of jail inmates, 56% of state prisoners, and 45% of federal prisoners were found to have a mental health problem.

2 of 3 inmates have a substance use disorder

In Virginia, **approximately 68%** of the DOC prison and non-prison (probation/parole) population **have a need for SUD treatment.**

129x risk of overdose death in the two weeks post-release

manatt

Collaboration with Public Safety

- **SUPPORT Act Section 1003 Grant Initiatives**
 - **Justice-Involved RFP:** Improve services for Medicaid members who are justice involved and who have a diagnosis of SUD which includes a reentry pilot program to link justice-involved individuals to community-based treatment.
 - Training and Technical Assistance
- **Medicaid Care Coordination Upon Re-Entry** (Governor's Budget - currently unallotted due to COVID-19)
 - FFFF. The Department of Medical Assistance Services, shall seek federal authority through waiver and State Plan amendments under Titles XIX and XXI of the Social Security Act to **provide care coordination services to individuals who are Medicaid eligible 30 days prior to release from incarceration.** The department shall have the authority to promulgate emergency regulations to implement this amendment within 280 days or less from the enactment of this Act.

Thank You!
