

King William County is working with all departments to assist with providing vaccination administrators and locations to host vaccine clinics. We are working directly with VDH in the Three Rivers Health District. We expect requests directly from our health department leadership. We are preparing to assist with providing assistance by providing venues (possibly through the schools), providers from all departments i.e. medics, nurses, and other providers capable of vaccine administration, and assistance with labor to help manage logistics.

Sincerely,

Stacy Reaves

Fire Chief

King William Fire-EMS
