

## Albemarle County Local Government

### [Director of Information Technology](#)

*Department of Information Technology*

Full-Time, 12 months

Exempt, VRS-Eligible, Benefits-Eligible

**The Director of Information Technology (IT)** oversees the technology used to support all aspects of the County Governments operations and related agencies supported by the County. This role is a direct report to the County Executive Office and serves on the Organizational Leadership team to provide overall leadership input and support across the organization.

The Director serves as a strategic partner to provide in-depth technical expertise of departmental systems and functions. This position is responsible for driving implementation of best practices for optimizing technology infrastructure, minimizing systems operational costs, and improving system performance.

The Director collaborates and partners with stakeholders across the County and partner agencies and must be an outstanding communicator in both oral and written forms, conveying technically complex information and concepts in easily understood terms to stakeholders. The Director must think strategically, critically, and creatively to develop, present, and implement an optimal technology roadmap and solution set across the County's government technology infrastructure and in alignment with the County's Mission and Strategic plan.

The Director must possess deep technical expertise, be current in Information strategies and Framework, while also being a positive, high performing leader who is a developer of IT talent for the County. The Director leads and manages the team responsible for all data processing / information / communication / telephone system functions both on premise and the cloud environment.
