

Hanover County Government
Department of Public Works
Civil Engineer (CD)
Salary Range: \$56,031.00 to \$87,000.00
Posting closes December 16, 2022

Hanover County Department of Public Works is seeking a candidate to join a dynamic team of engineers. Duties include a wide array of engineering and project management activities in the field and office. This position works in site and subdivision engineering, transportation engineering, construction project management, Chesapeake Bay Preservation Act implementation, erosion and sediment control, and drainage and stormwater management. Candidates will communicate with citizens, engineering consultants and a variety of stakeholders helping to resolve problems and implement projects. Training and mentoring is provided to ensure success. If you are chosen for this position, you can expect to:

- Ensure that plans for construction projects are complete and meet the project goals and requirements for regulatory compliance.
- Work with contractors, engineers, scientists and other government agencies to facilitate approval of public and private projects.
- Inspect construction projects such as subdivisions, commercial developments, and roads to ensure that they are built according to approved plans and they protect adjacent properties, wetlands and other sensitive environmental features.
- Manage a variety capital improvement projects for the County involving new construction (roads, drainage, etc.) as well as repair and maintenance.
- Help citizens navigate the regulatory requirements for development and assist them with practical and technical advice on drainage and other concerns.

If you are looking for a career with a range of responsibilities, where you can develop a variety of skills, Hanover County offers a great opportunity within a supportive team environment.
