PUBLIC SECTOR

Promoting Livability, Workability and Energy Efficiency

ESG's Public Sector team of specialized engineers, construction managers, and business developers has implemented over 550 projects totaling over \$2 billion

Customers

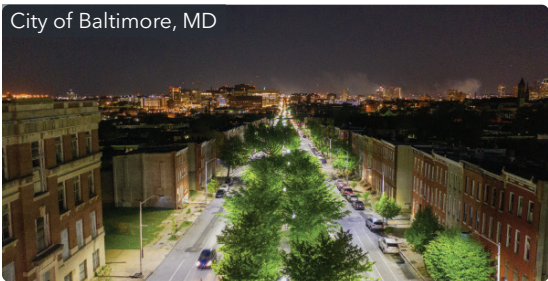

- Airports
- Colleges and Universities
- Commercial and Industrial
- Hospitals and Healthcare Facilities
- K-12 Schools
- Local Government and Municipalities
- State Government
- Utilities

Through its core business of energy performance contracting, ESG's Public Sector team provides comprehensive design-build energy and infrastructure solutions where guaranteed savings from operating budgets are used to finance capital improvements.

From the initial energy audit and engineering scope through construction and long-term measurement and verification of savings, ESG designs and implements infrastructure modernization solutions including energy efficiency, renewable energy, distributed generation, water conservation, and sustainable operations.

ESG's Public Sector team uncovers opportunities to drive revenue, reduce costs, and modernize infrastructure. From concept to reality, our broad depth of expertise and turnkey solutions make it a holistic, reliable partner that can effectively orchestrate the implementation of comprehensive solutions with a focus on measurable technical, financial, and operational results. Together with our customers, the ESG Public Sector team improves living, working and learning environments, and makes communities safer, more efficient, and resilient.
