

## Our Smart Solutions Include:

- + Lighting
- + Parking and Traffic
- + Water
- + Waste
- + Buildings
- + Security

## OUR PROCESS

### Identifying Solutions

We uncover opportunities to drive revenue, reduce costs, and modernize infrastructure.

### Integrating Solutions

We connect the dots. From monitoring energy use to automating meter readings and intelligent parking, we create connected cities that attract residents and businesses.

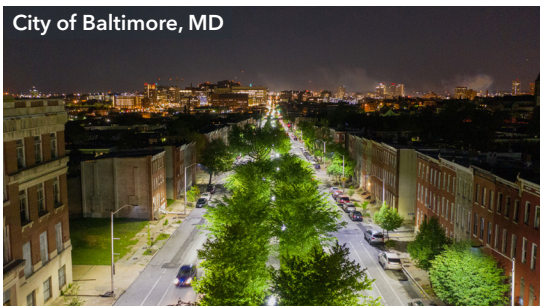

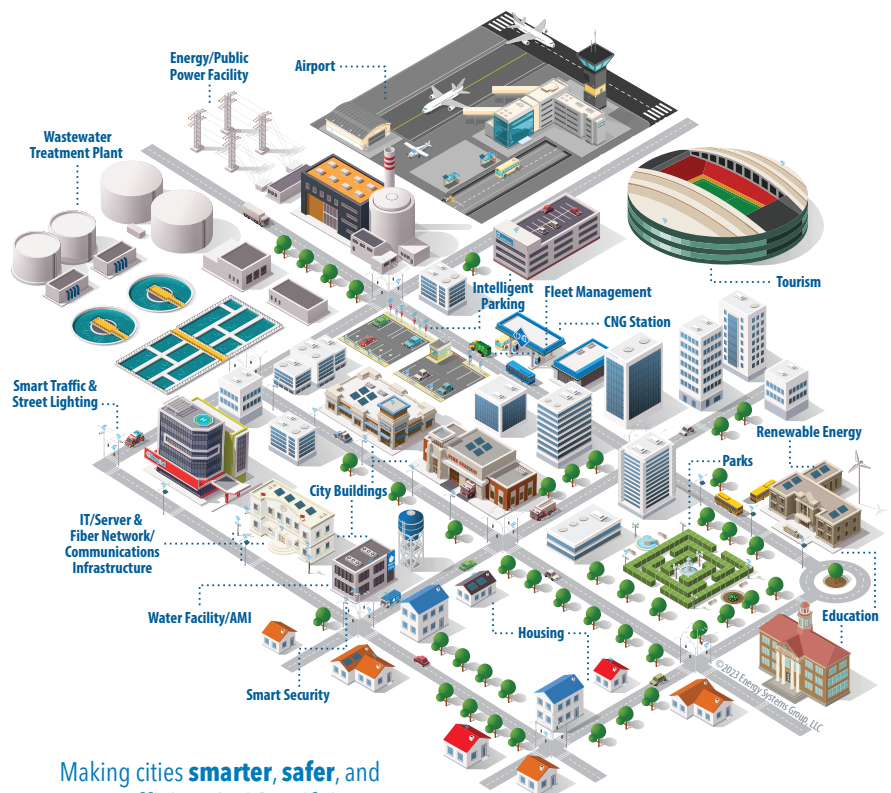

### Implementing Solutions

We plan, design, and manage the full spectrum of smart city solutions. From concept to reality, our broad depth of expertise affords cities a holistic, reliable partner that orchestrates the implementation of comprehensive solutions with a focus on the technical, financial, and operational details.

## PROMOTING LIVABILITY, WORKABILITY, AND RESILIENCY

As a trusted advisor, ESG helps cities and counties identify and integrate solutions that advance their goals and objectives while driving operational efficiencies and improving livability, workability and resiliency.

From building upgrades to wastewater treatment and smart street lighting, ESG's team of leading engineers, project managers, and solution architects help make cities smarter, safer, and more efficient by identifying, integrating, and implementing comprehensive energy, technology, and infrastructure solutions.

City of Baltimore, MD

Making cities **smarter, safer,** and more **efficient** by **identifying, integrating, and implementing** comprehensive **energy, technology,** and **infrastructure solutions.**
