

Electrical Code Inspector I or II (Residential Combination Inspector)

An Overview

The Code Inspector positions are part of a career ladder with increasing responsibilities. As a Code Inspector I, you will perform entry-level code inspection related work; as a Code Inspector II, you will perform technical code inspection work on new and existing construction and renovation projects in residential and commercial buildings for compliance with Virginia's Uniform Statewide Building Code (USBC). **You will need to be able to perform Building Inspections as well as residential Electrical, Plumbing, and Mechanical Trades.** This work is performed under the general supervision of the New Construction Manager.

The Opportunity

- Performs Code Inspection's in accordance with the USBC (Virginia Uniform Statewide Building Code);
- Assists other staff by researching specific provisions of codes, ordinances, and related City policies;
- Assists in the development of technical training concerning applicable codes, ordinances, policies, and regulatory requirements;
- Reviews construction documents with contractors, homeowners, architects and engineers regarding the requirements of the USBC, related construction practices, industry and maintenance standards;
- Addresses complaints, communicates abatement action, and provides required follow up;
- Identifies and documents illegal construction and prepares violation notification and corrective direction;
- Operates and maintains a City vehicle and all other issued equipment;
- Attends training to maintain continuous education and certification requirements as required by the Virginia Department of Housing and Community Development and the Department of Code Administration;
- Maintains a current knowledge of City and department policies, procedures and guidelines;
- Attends meetings and testifies in court, as required.

The Ideal Candidate

The ideal candidate would ideally have an electrical background and must have knowledge of the National Electrical Code as well as the Virginia Unified Statewide Building Code which apply to building and construction or the ability to readily acquire such knowledge. The ideal candidate must have the ability to read and interpret construction plans, drawings, and specifications. Working in a team environment and fostering a positive working atmosphere with internal and external customers is equally as essential.

Code Inspector I -To qualify for the Electrical Code Inspector I position, all candidates must possess three years of experience in the Electrical field; or any equivalent combination of education, training and experience or an associate degree in engineering, architecture, building construction or related field with 1 year of experience in a construction related field.

Code Inspector II - To qualify for the Code Inspector II, you must have four years of experience in the construction or construction inspection related field; or any equivalent combination of education, training and experience or an associate degree in engineering, architecture, building construction or related field with 2 years of experience in a construction related field or a bachelor's degree in engineering, architecture, building construction or related field.

All candidates must have a valid driver's license, and selected candidate must meet active City of Alexandria Code Inspector Career Ladder requirements within the probationary period of twelve (12) months after their original appointment.
