

**Jeffrey Farner, Deputy Director**

**Department of Planning & Zoning – Alexandria Va**

25 + years' experience in urban design, development and planning in a combination of public and private sector positions. My focus has been elements such as master plans, urban design and extensive community engagement. I believe in creating teams and projects to make our built environment a better place for all users and involving all users to make our projects better and more implementable. I also believe and practice working with multiple disciplines and backgrounds in all of our projects.
