Fauquier County Government – IT Project Manager

The Fauquier County Department of Information Technology is seeking a highly motivated and experienced IT project manager to lead the planning, execution, and successful delivery of complex technology initiatives across all County departments. In this role, you will be responsible for coordinating cross-functional team, managing project timelines, and budgets, and ensuring the delivery of IT solutions that align with County business goals. You will provide project oversight and facilitate communication among stakeholders to ensure accuracy, timeliness, and quality of services delivered.

Qualifications:
- Bachelor's degree in Computer Science, Information Technology, Business, or related field.
- 5 years of project manager experience
- Project Management certification is preferred
- Strong understanding of data privacy and compliance standards, including PCI, PHI, PII and CJIS.
- Proficiency with project management tools and methodologies such as MS Project, Agile, and SCRUM.
- Ability to manage multiple priorities in a fast-paced environment.
- Excellent organizational, Communication, and leadership skills.
- Local Government experience
